

Effective non-toxic pest control solutions for Professionals

Complete protection for a healthy environment

Insects and pests can cause major problems in the hotel and restaurant sector. Horeca Line allows you to detect and eliminate insects and pests in time. You minimize operational stoppages and disruptions to production, benefiting both your business and your reputation.

In the food industry and other industrial sectors where there are stringent demands for hygiene, insects and pests can constitute a major problem, costing both time and money. Food & Industry Line provides you with the latest solutions that detect and eliminate insects and pests in an environmentally-friendly and effective manner. Simply and safely.

Customized Glue Trap

With its Core Dot™ Application Technology, Silvanderrsson may provide an entirely customized trap for your needs and wishes. To create a customized trap, Silvanderrsson and you as our client cooperates closely. In the end, together we will create the cheapest effective monitoring trap for your needs.

Core Dot™ Application Technology

The 10 year experience of Core Dot™ Application Technology enables variation of substrates and products. Core Dot™ Application Technology enables variation of substrates and products. Knife sharp edges, wide coating temperature range and wide viscosity range is offered. Glue could be applied in any shape and on any surface - and only where you would want it. If preferred, your own raw material could be used to manufacture any customized product, albeit our 30 years of experience in making traps might call for consultation on combination of raw material.

Our brands for effective non-toxic pest control solutions:

SILVANDERSSON

*Manufacturing expertise through
state-of-the-art equipment, operational
excellence and experience combined*

Silvandersson headquarters and production plant in Knäred, Sweden

Our production plant in Knäred, Sweden has been constantly improved, developed and expanded since the early 1980s, in order to meet our customers' daily expectations on our high-quality standards in terms of both product quality and client services.

Today, the production plant encompasses more than 40,000 square feet in total and offers a great variety of manufacturing alternatives in a wide range of pest control segments.

Together with high quality and up-to-date machinery and customized technological solutions, Silvandersson offers a blend of product and manufacturing expertise with great customer service and market understanding.

The Company

Silvandersson Sweden AB is a manufacturer of pest control products founded in 1982.

A cooperation with the food provision industry and FOA (Swedish National Defence Research Establishment) lead to the first unique product, based on a special glue.

This first product has since undergone changes, adjusted to different needs and the different environments in which it is used.

Silvandersson is currently the world leader in

environmentally friendly and non-toxic insect and pest control.

Our most important customers consist of farmers, horticultural growers, professional pest control operators, food industry participants, and home owners.

More than 90% of the company's production is exported to more than 47 countries.

Since 2013, Silvandersson has its subsidiary Silvandersson USA, Inc. in Jackson, TN.
